

Dinosaurs

Dinosaurs are reptiles who died out about 65 million years ago. Some were small like chickens, others were enormous. Some fed on plants, others only ate meat.

Dinosaurs laid eggs and their babies hatched from them. They soon grew and had to defend themselves as meat eating dinosaurs would attack plant eating dinosaurs.

One of the most famous dinosaurs is the T-Rex. Over time the remains of dinosaurs sank into the earth. Scientists dig them up and study them.

Q1. How long ago did dinosaurs die out?

Q2. What did dinosaurs feed on?
